f. Management's perception of risk factors ;

The Major Segments of operations of the Company are Sugar and Chlor Alkali.

The major aspects of concern for the Sugar Sector are:

- 1) Harvesting Labour
- 2) Power to operate the irrigation requirements
- 3) Proper Cane Varieties that give good Cane and Sugar yield and that are suitable for mechanical harvesting.

To get around the 1st aspect, the Company has embarked upon locating the right Cane Harvester suited to our Grower Farm sizes. The 2nd aspect is being taken care of by setting up a Solar Powered Pumping System at our R & D Farm so that our Growers could ultimately be provided the right guidance in this aspect. The 3rd aspect is being met by the Cane Breeding Programme undertaken by the Company. 2 Varieties out of the programme will be released for Grower use this year and will be followed by a few more next year.

Chlor Alkali segment is power intensive where Power constitute a major input cost. Restricted power supply and increased power cost have become a cause of concern. To mitigate this impact, a Solar Power Plant has been put up at Kovvur. At Saggonda location a 33 MW Coal Based Power Plant has been successfully synchronized with State Electricity Board. This would improve the power availability to the Chemical Plants.
