- Identification of areas of Risk

The Major Segments of operations of the Company are Sugar and Chlor Alkali.

The major aspects of concern for the Sugar Sector are:

MANAGEMENT DISCUSSION AND ANALYSIS:

The Management Discussion and Analysis Report set out hereunder supplements the Directors' Report and the Audited Financial Statements forming part of this Annual Report.

SUGAR INDUSTRY :

Sugar Industry in India for the past six years has been ending up with an increasing surplus of sugar that stands at about 11 Million tones today affecting the viability of this Industry. To add to this situation is the non-implementation of the Recommendations of the Rangarajan Report, which had recommended the linking of cane price to the realization from sugar and other products. The cane price today stands above the sugar price. Drastic fall in Sugar price and steep increase in the cost of production has put this Industry in a very difficult situation. As of today apart from sugar, the Indian Sugar Industry is surviving with Co-generation and the production of Ethanol both of which are products utilizing Begasse and Molasses, which are bye-products of Sugar. It is possible to be able to get around today's situation by utilizing Sugar to produce other value added products like Fine and Bulk Chemicals, Pharmaceuticals, Bio-plastics, Bio-polymers & others. It is by utilizing sugar in this way that the ever growing expenses of Sugar Mills can be taken care of without the need of constraining the production of Sugar.

In the context of prevailing dismal scenario, there is an urgent need for Central and State Governments to lay down some firm policies to bail the Industry which is in crisis. Abolition of VAT, CST, duty on Molasses on interstate movement, creation of buffer stocks, allowing Mills to produce Ethanol directly from Cane juice, duty exemptions for procurement of Mechanical Harvesters, providing programmes to help cane growers to switch over to mechanization of sugarcane and the farming in a big way to bring down the cost of sugarcane production and several other allied reliefs are required to be provided on priority basis to ensure the survival of the Sugar Industry.

Your Company's focus has been to overcome the problems of lack of harvesting labour, Non-availability of good sugarcane varieties for achieving high recovery and yield, infestation of sugarcane by pests and diseases.

Keeping this in mind, efforts are being made for the implementation of Mechanization in sugarcane planting and harvesting. Last year, Mechanical planting with wide row spacing in 100 acres was demonstrated for mechanical harvesting. This year, Mechanical Harvesters have been used and harvested over 100 acres. Results have been encouraging with farmers being convinced about the suitability of Harvesters to maintain the cane loss to the minimum.

To develop the high sucrose and high yield sugarcane varieties, sugarcane breeding program is being carried out in sugarcane R&D farm. After the evaluation of field and Mill test, two varieties were identified and released for seed multiplication in the farmer's field in the extent of 275 acres. With this, these varieties can be supplied in commercial quantities.

To minimize the damage due to borer pests, a Bio-control Lab has been established to produce and supply the Trichogramma and Tetrastrius. Trichogramma cards are being released in the infected areas. This will improve the sugarcane recovery and yield.

We obtained CFE, on 04-09-2010 for Expansion of the Plant to 6000 TCD and to install 31 MW Power Plant. We have obtained CFO only for expanded capacity of the Plant, without power plant. The valid of the CFE to install Power Plant is up to 04-09-2015.

Keeping in view the interest of the farmers, your Company has been paying a Cane price higher than the "Fair Remunerative Price" in addition to Incentives and Subsidies to ensure that farmers see cane farming as remunerative as other commercial crops.

CHLOR-ALKALI AND OTHER PRODUCTS:

Your Company has an integrated Chlor-Alkali Chemical Complex manufacturing Caustic Soda, Chlorine and other allied chemicals. Chlor-Alkali is power intensive sector where power constitutes a major in-put cost. Power availability at a competitive cost to meet the production requirement of Chemical Plants has been a major cause of concern. Your Company, as an equity investor in APGPCL, a gas based power generating company has an entitlement to 41.06 M.W. of Power. The cost of Power availed from this source has been cheaper compared to the power availed from State Electricity Board. As the Gas allocation to APGPCL has been curtailed APGPCL is not in a position to generate Power upto the full capacity. This necessitated APGPCL to restrict the power supply to their shareholders which compelled your Company to buy power from other sources at a higher tariff

The Andhra Sugars Limited

which has been impacting the cost of production. Keeping this in mind, your Company is implementing a 33 MW Coal based Power Project at Saggonda Chemical Complex. This would ensure required power for chemical plants.

Disposal of Chlorine, which is a bye product at Caustic Soda Plant remains a challenge as the end users have gone in for Chlorine Fuel Technology in their manufacturing process, To overcome this bottle neck, your Company is looking into the possible avenues for disposing Chlorine in order to enable the running of Caustic Soda Plant to be full capacity.

As domestic price realisation of Aspirin is not encouraging, your Company's focus is on to widen the international client base. Your Company's Aspirin facility has been upgraded to meet the international Standards (CGMP). Required Audit Certificates have been received from USFDA and EDQM. Aspirin Plant has received ISO Certification. Several overseas Multinational Companies have evinced interest in our product. During the year under report the capacity utilisation of Aspirin plant increased consequent upon which Aspirin division could make a marginal profit which facilitated the Company to move ahead with optimism for establishing a firm base in international market. Steps are being taken to obtain regulatory approvals for expanding this plant. In the coming years our focus would be to widen the International client base.

INTERNAL CONTROL SYSTEM

Your Company conducts a review of the financial and operating controls of the various Units. The Internal Control System of your Company is commensurate with its size and nature of business.

SEGMENT-WISE PERFORMANCE

Segment-wise performance has been given separately vide Annexure - II of Group Consolidated Accounts.

FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE

The gross Fixed Assets of your Company as on 31.3.2014 is Rs.901.25 Crores compared to Rs. 887.59 Crores during the previous year 2012 -13. Your Company has a net worth of Rs.555.12 Crores.
